Re: OsteoMed Grant Program Suspension

Dear Grant Applicant:

Thanks to OsteoMed's success as a leading global innovator, developer, manufacturer and marketer of specialty medical devices, surgical implants and powered surgical instruments, we enjoy the ability to provide grants and charitable donations in support of orthopedic surgeons and their patients. However, during this unprecedented decline in worldwide surgeries due to the COVID-19 pandemic, OsteoMed, unfortunately, cannot sustain its grant program in the face of the growing economic hardship the pandemic has caused.

Regrettably, OsteoMed is forced to suspend the grant program until such time that surgeries resume and OsteoMed recovers from this unexpected event. We realize this difficult decision will likely cause hardship for institutions and organizations that have received past support from OsteoMed, and apologize that we are unable to consider grant applications at this time.

Effective immediately, OsteoMed is unable to support any pending or new application for a monetary grant or charitable donations.

Rest assured, OsteoMed leadership and employees are working tirelessly to navigate this challenging situation and are continuing to provide the finest quality products our surgeons and patients expect from OsteoMed.

Sincerely,

The OsteoMed Grant Committee
