Fully disposable fixation system
The InstaFix™ system is a body temperature activated shape memory fixation system indicated for arthrodesis, osteotomies and skeletal fixation procedures. The use of Nitinol, a shape memory alloy, allows InstaFix™ to provide continuous and active bi-cortical compression at the surgical site.

features & benefits
Sterile & fully disposable
• Cost savings for hospital or surgery center
• Eliminates pre & post-operative set management

Body temperature activated Nitinol implant
• Instantaneous and continuous compression
• Eliminates the need for external heating
• Simple alternative to plates & screws

Ergonomically designed instrumentation
• Reduces surgical complexity
• Provides maximum visualization of surgical site

Low profile implant design
• Helps minimize tissue disruption
• Offers unobstructed views for post-op X-rays
